

Bollenback Builders Inc. p2

Bollenback Builders erected a temporary wall across the width of the old building to separate the fellowship hall/kitchen/vestibule area - which will be completely demolished - from the former restroom/library/thrift shop work room area - which will be extensively renovated. The wall is visible in the two photos below; from the Administrative wing side on the left, and from what will be the outside on the right.

New wall (below left), looking into fellowship hall (the stud wall visible on the right of the photo formerly separated fellowship hall from the corridor).

Photo on the right shows bracing used to support the roof trusses in the former restroom area during demolition.
